Why should I join the **OVERHEAD CARE CLUB?**

All it takes is the tiniest of openings. With an opening the size of a pin head, water will find a way. When it does, it quickly destroys your safety, comfort, and possessions.

Even worse, you may not even know when water has made its way into your home until it's too late. You won't know there's a leak in your roof until there's a water spot on the ceiling, a trickle of water down your wall, or an inch of water in your kitchen.

Your roof is the only reliable line of defense from a devastating water invasion.

Your roof is constantly changing. Every heat wave or cold snap expands and contracts your roof. Every gust of wind or drive of rain alters its integrity. Any strength of storm can do invisible damage to your roof's structure and protection.

In fact, each year weather causes an average of eleven billion dollars of damage from hail, thunderstorms, hurricanes, floods, and tornadoes. **But, you can protect your home and family from the threat.**

As an **Overhead Care Club** member, we're on your side. We'll be your eyes when it comes to finding the seemingly invisible signals of water damage **before** it invades.

PROTECT YOU

"If your roof is more than 20 years old, there's a good chance it's due for replacement. But younger roofs can fail, too, so it's a good idea to inspect a roof at least once a year."

Tom Silva, www.thisoldhouse.com

"It doesn't take a lot of effort to prevent water damage. A regular inspection and maintenance schedules for the exterior building structure and interior appliances and fixtures may help reduce or prevent costly water damage."

State Farm Insurance, www.statefarm.com
